Dear Valued Patient:

We here at the Davis Dental Center strive to provide our patients with the best dental care possible while simultaneously utilizing modern technology. Our practice has recently adopted a new system called Smile Reminders that sends out email, text message, or both to patients to remind them of upcoming appointments. This new system will help our office work more efficiently with respect to appointment reminders. We understand that some patients will not benefit from this service, as some do not have texting capabilities and/or email accounts. Those patients that wish not to be included will resort back to traditional method of phone calls. Please check the option below that best suits you.
